ClearNav Software Upgrade 2.2.0.73

1. Download the new ClearNav software

2. Unzip the file.

3. The result will be as follows (size may differ slightly):

Name	Type
Languages	File folder
Sounds	File folder
ClearNavUpdater.exe	Application
ClearNavUpdater.NKS	NKS File
CN.exe	Application
CN.NKS	NKS File

4. Plug you ClearNav USB stick into your PC and open it up. The result will be similar to this:

ClearNav Upgrade

Name	Size	Type
Flights		File Folder
Languages		File Folder
Map Data		File Folder
ClearNavUpdater.exe		Application
ClearNavUpdater.NKS		NKS File
CN.exe		Application
CN.NKS		NKS File
Log.txt		Text Document

Note 1: If your stick is not exactly the same and contains several other files that's okay and totally normal.

Note 2: If you use a memory stick not supplied by ClearNav - make sure the size is no larger than 4GB. Larger memory sticks available will not work.

5. Delete the following:

   ClearNavUpdater.exe

   ClearNavUpdater.NKS

   CN.exe

   CN.NKS

   Languages Folder

6. Replace the files you deleted from the stick with the four NEW program files - and the Languages Folder and Sounds Folder.

7. Plug your ClearNav USB stick into your ClearNav and then turn it on.

8. ClearNav Updater will boot. Check the software box and sounds box (if FLARM voice alarms are desired) then check the update box.

9. The ClearNav software will load and then the ClearNav will boot up.

10. You should see v2.2.0.73 on the boot screen.

11. Make sure your ClearNav is updated to the latest firmware version.
